

Cetetherm

NIBE GROUP MEMBER

Providing sustainable heating and cooling systems for over 60 years.

Innovation for a climate and cost-conscious world.

Cetetherm – Ahead of our time 60 years ago, ahead of the curve today.

We've led the way in sustainable, efficient, cost-effective solutions for the district heating systems, district cooling systems, and collective boiler room markets for over 60 years – and we continue to lead the market today, thanks to our ethos of expertise, innovation and quality.

Quality manufacturing, swift supply, expert advice, and 5-star service both pre- and post-sales are all part of the deal - always. So, for your sustainable heating and cooling solution, contact Cetetherm today.

Welcome to Cetetherm

We are a leading manufacturer of high-tech heating and cooling solutions for district heating and collective boiler rooms, supplying domestic hot water, space heating and space cooling.

Our focus is on energy efficiency, sustainability and smart connectivity – when you buy Cetetherm, you buy to last.

Cetetherm Group

- Part of the NIBE Group.
- We offer turnkey solutions for customers looking for energy efficiency and sustainability.
- We combine hydraulic know-how with the latest technologies in Artificial Intelligence (AI) to reduce energy costs and climate impact.

Our Production Facilities

Cetetherm AB in Sweden, Smart and connected district heating & cooling systems; Heat Interface Units and substations.

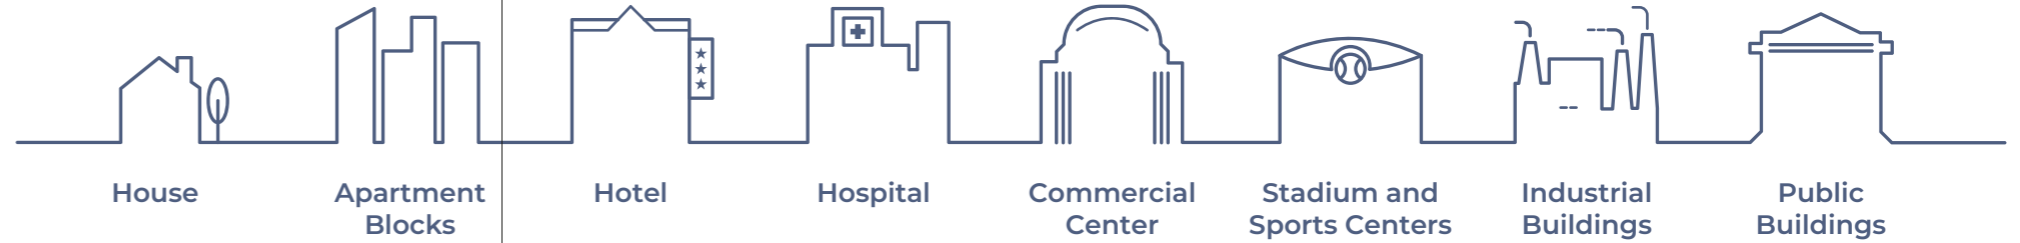

Cetetherm SAS in France; Tap water systems & hydraulic expansion systems for collective boiler rooms.

Cetetherm SRO in Czechia; Tailor-made solutions for district heating & cooling systems.

Our Applications

Solutions for any type of building:

Any type of heat source:

Our Solutions

Plug and play
Ready to use, standardised systems

Modular
Pre-configured systems, enabling optimum flexibility & short lead times

Bespoke
100% customised systems to suit your individual needs & specific building requirements

For our heat-pump-ready systems and other hybrid solutions - talk to us.

Our Products

Heat Interface Units (HIUs)

District Heating & Cooling Substations

Heating Cooling

Tubular Heat Exchangers

Tap Water Systems

Storage Tanks

Hydraulic Expansion Systems
